#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Response to Amendment***

The amendment filed on 2/03/2006 and the remarks presented therewith have carefully considered. Applicant's arguments with respect to the claims have been considered but are not persuasive.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 1,4,5, and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Chisler.
2. Re claim 1, Chisler discloses a device for load suspension comprising a plate (3) and at least three connections points (7) spaced around its perimeter for connecting said plate to a load or a lifting device; said connection points are apertures in said plate for attachment of said plate to shackles (8); further comprising a shackle connected to said load transfer plate at each said connection point, said shackle being rated to carry said load (col. 1, lines 10-45).

Art Unit: 3652

3. Re claim 4, said plate is triangular and said apertures are located in the three corners of said plate (figs 3,4,5,6).
4. Re claim 5, said plate has rounded corners (fig 3).
5. Re claim 7, said plate is tri-lobed, and said apertures are located in the three lobes of said plate (fig 3).

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Chisler in view of Ferrieri. Chisler discloses a triangular plate in which apertures are regularly spaced around the plate. Chisler does not disclose the plate is circular. Ferrieri discloses a circular plate for lifting objects; because the lifting device is round it is able to be rotably adjusted (col. 2, lines 36-59). It would have been obvious to one of ordinary skill at the time of the invention to modify the lifting device of Chisler as taught by Ferrieri to include a circular shape in order to rotatably adjust to the object being lifted.

Art Unit: 3652

7. Claims 8 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chisler. Chisler does not disclose the plate is cut from a bar of steel. It would have been obvious to one of ordinary skill in the art to fabricate the plate from cutting a bar of steel because steel bar is well known in the art as a sturdy material capable of supported heavy loads.

### ***Response to Arguments***

Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 3652

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
